

MX1000HD-Xtream Important Instructions

APRIL 17, 2015

VOLUME 1, NUMBER 1

"Make sure you don't Change any Major Settings On The Box or Install or uninstall any apps as this can stop the auto updates on the box."

MX1000HD-Xtream TV Box has an exclusive software build

Auto Updates Daily So You Never Need To Update Anything

Confused Just Contact Us.

Quick 3 Stage Set-Up Instruction's (Important)

1. When first installing your new **MX1000HD Media Box** Please **Make Sure** you plug in the **HDMI and The Network Cables** First **before** you plug in the Power Cable, Then Plug in the **Power Cable** to the Box **Last**.
2. Now plug in the **power adaptor** and connect **power lead** to the **MX1000HD** it will **power up straight away** and connect to your **router**.

After a few minutes the **"INSTALL BUILD"** Screen will appear as follows; **(If Not then the Build may have already been Pre-Installed for you so ignore stage 3 below and you're now ready to go)**

3. Install the New 2015 Build

You Must Select **"INSTALL BUILD"** Do NOT select anything else or your upgrade build may fail and the box will need to be returned for re-programing, just follow instructions below;

The First time you switch on your MX1000HD-Xtream Box You Will May See A Main Screen with **"INSTALL BUILD"** in the Main Ribbon Menu, You MUST Now Select **"INSTALL BUILD"** See on left,

Then Go through the on-screen questions and Agree To The Disclaimer Messages that follow,

And select **"Reboot"** when asked to do so on the last screen.

Once you have selected reboot your box will reboot and download the latest build software from the dedicated server, this can take around 20 to 30 minutes and will re-boot 2 – 3 times **DO NOT SWITCH OFF or DISCONNECT THE BOX FROM THE INTERNET** while this is taking place,

After 20 to 30 minutes you will see a new settings screen in the new build, please wait a few minutes to allow for any online app's to fully update before normal use, now switch off the box into standby wait 5 seconds and switch on again,

Quick Setup Over, That's It, Now Sit Back And Enjoy.

NOTE: You may have received your box with the new 2015 build Pre-Installed And Fully loaded, in this case just ignore the "Install The New 2015 Build" Stage 3 Above.

Please Make Sure You Read Important Notes on "Settings" on page 2 "PTO"

IMPORTANT NOTES ON "SETTINGS" for MX1000HD

It is best to stay away from any settings and really **You have no need to go into the settings** as the **server updates everything for you daily**, if you do have to go into settings for any reason then please make sure you **do not add, change or remove any settings or software apps**, although you can change things like weather town, time zone, Screen saver settings and entering pass details if required to do so, just **don't do any changes you have not been instructed to do**.

WHAT HAPPENS IF I CHANGE ANY SETTINGS OR APP'S In Any Way?

Installing or uninstalling anything including app's **can stop the dedicated server** from **auto updating the MX1000HD** and this will lead to the box going **out of date** and eventually needing to be completely Re-Programmed at a cost of £25.00 +Vat if needed, This charge is to cover time and return carriage costs etc.

What's included?

1. MX1000HD-Xtream HD Media Box
2. MX IR Remote
3. HDMI Lead
4. RJ45 Network Cable
5. PSU Power Supply
